1	IALA	Change the domain address to Official one	
2	France	a problem with position, I entered the position in WGS 84, but it seems there is a conversion, so the AtoN is not at the correct position	
3	France	The Aton name is not taken into account	
4	France	Is it possible to modifcat a feature once is entered ?	
5	France	What is the country code ?	
6	France	Light characteristic : add : quick flashing/Long-flash and very quick flashing/Long-flash	
7	France	Feature type lighthouse : structure colour : add : natural or none (for stone or wood) and it might be several colours	
8	France	Feature type lighthouse : Colour pattern : add none.	
9	Canada	Unable to edit entry after entering	
10	Canada	Sometimes, the name of the aid appears as "null."	
11	Canada	Unable to include additional equipment related to the aid (e.g. adding a bell to a buoy)	
12	Canada	The testbed allows users to include information that does not appear after when clicking on an aid (e.g. "Installation Date")	
13	Canada	The testbed automatically generates an "AtoNNumber" and "idCode" for both the structure and the light of an aid based on the country code provided and in order of feature creation.	
14	Canada	The testbed appears to be "adjusting" the coordinates of most aids slightly.	
15	Canada	It appears that the "Light beacon" type does not have all the fields necessary to sufficiently capture information for sector and range lights.	
16	Canada	the light colour is not necessarily predicted correctly for "Light buoy" types that are "BuoySpecialPurposeGeneral."	
17	Canada	the choice of colours and patterns do not match what is used in Canada, as well as the lack of indicating the presence of a daymark, and therefore it would not be possible for the testbed to accurately predict the colour of the light of these aids.	
18	Canada	The testbed allows the user to indicate the colour of the light for the "Lighthouse" type	
19	Canada	There appears to be a typographical error under the S201:Landmark attribute names where it is written "visuallyconspicius" and should be corrected to "visuallyconspicuous."	
20	Canada	The English name of an aid was indicated under the "Name" field, while the French name of the aid was indicated under the "Name in national language" field.	
21	Canada	Only the year could be provided for the "Installation Date" field.
