Comments on Recommendations plan for Standards

1 RELATED DOCUMENT

Input paper PAP33-10.2 Recommendations plan for Standards

2 DISCUSSION

Topic areas under VTS Standard look good. However, the last topic area in the original document named “VTS additional services” had been missed or deleted. Actually, it doesn’t matter for the time being because this topic is related to the future additional services of VTS and there is no any related existing document. If VTS Committee produces any paper (Rec. or GL) in the future, it may be placed in “VTS operations”.

Topic areas of the Training and Certification Standard is now a bit confusing and doesn’t fit VTS training related matters. Assessment should normally be a part of training, and competency, certification and revalidation may also be in the same topic. So, my proposal is to have two topic areas;

- Training and Certification (which may cover assessment, simulation in training, competency, revalidation, etc.)
- Accreditation and Approval for Training Organizations (our Guideline 1014 is a large document, we may have one recommendation on this topic, details with accreditation and approval process could be several GLs.

Human Factors and Ergonomics under Training and Certification Standard had been deleted. As it has a particular importance for VTS, I propose to add a new topic “Human Factors and Ergonomics” under VTS Standard if it is not placed under the Training and Certification Standard.

Anyhow, the plan should be discussed by the Committees as requested by Council.

3 ACTION REQUESTED

PAP is requested to consider the above comments.
