## 2. Travel Information

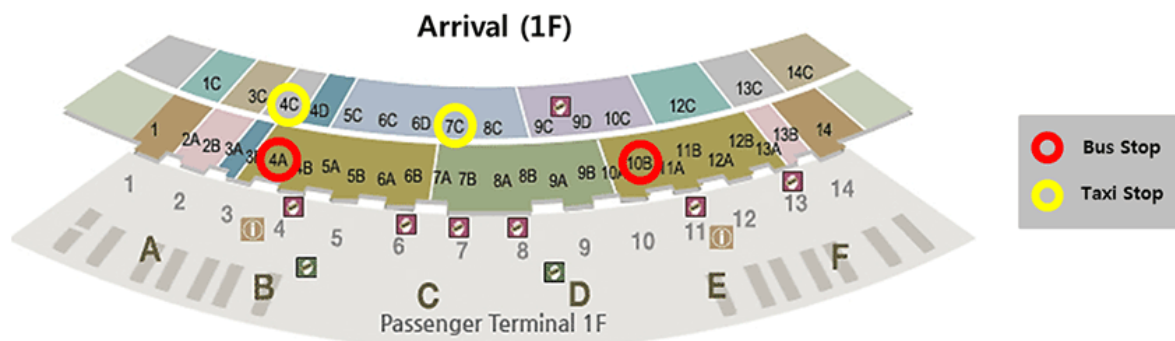

Upon your arrival at the Incheon International Airport, our staff will greet you at the arrival hall of **the Airport** with your name on a signboard. We will provide you with round-trip airport limousine tickets between the Incheon International airport and the hotels.

If you cannot find our staff, please visit the information desk No. 44 on the 1F of the Airport.

The airport information desk is located between exit gate No. 8 and 9.

For your information, refer to the following map:

## 4. Technical Tour

- Date & Time: June 15 (Thu.), 2017, 08:30-17:30
- Tour Course: Samsung Innovation Museum, Palmido Lighthouse
- Samsung Innovation Museum

Our lives have improved as great inventors and numerous electronics companies continued to introduce new technologies and products to the world through endless research and innovation.

The invention of radio and TV led to the development of mass media, and the communications and computing technologies brought about a revolution in generating, distributing and consuming information.

As suggested above, the electronics industry has built a bedrock for humanity in advancing civilization, and its history is a record of our challenge and desire in discovering new values. With the three Halls - Era of Inventors, Era of Corporate Innovation, and Era of Creation - Samsung Innovation Museum shows not only the history of the electronics industry but the achievements that Samsung Electronics has made in IT with its leading semi-conductor, display and mobile technologies.

At the end of the tour, you can see our commitment to a prosperous future founded on the true meaning and value of innovation.

We hope that Samsung Innovation Museum helps you experience the history of the electronics industry and discover the meaning of innovation.

- Palmido Lighthouse

Palmido Island is situated in Jungu, Incheon, and made of two islets connected by sand spout. And the Island is shaped as the downward tales of 八 (a Chinese character meaning No.8). That is why the name of the island is called “Palmi” (Pal means 8 in Korean and mi means tale). The white lighthouse standing tall on the Island, 15.7 km away from South of Incheon harbor, is located on the entry course and safely guides ships entering and departing the harbor. It is the first Korean modern lighthouse built on 1 June, 1903. And it has been designated as the National Lighthouse Cultural Asset No.1. It was renovated in December, 2003 and now is equipped with high-tech facilities and equipment such as 26m tall lighthouse tower, 100-year anniversary Symbolic Sculpture and DGPS. The light of its lantern is a large-scale prismatic rotary system developed entirely with domestic technology. It is visible as far as 50 km and flashes every 10 seconds.
