

IALA COUNCIL
64th session

13-16 June 2017
Incheon
Republic of Korea

8 – STRATEGY AND POLICY

8.1 – Policy Advisory Panel

8.1.3 Position on the development of AtoN services

Note by the Secretariat

1. BACKGROUND

The document at input paper C64-8.1.3.1, rather long in gestation, developed by the Secretariat and reviewed and agreed by PAP at its 33rd session, sets out IALA's position or view on the various aspects of the development of aids to navigation in the near future

It is also now the vehicle for carrying expressions of priority for work items, and also stating where and where not IALA will venture in its AtoN activity

This document contains the "Trends and Drivers" relating to IALA's technical work. These were discussed and employed, but not recorded, in the preparation of the to-be-superseded 2014-2026 Strategic Vision

This document will be a "living document" and should be reviewed by PAP at least once per annum and maintained up to date. Its purpose is as a management-level document with limited technical content. It would benefit from supplementary technical documents, but not as annexes, and so a place will be made in the website for these - already a document on R-Mode use of MF radio beacons is available.

2. SUPPORTING DOCUMENTS

Input paper C64-8.1.3.1

In December 2016 and January 2017, SG DSG and Dean reviewed the Study and chose Option 1 from the Study for presentation to the Policy Advisory panel at its session 33.

3. CONSIDERATION BY PAP

Input paper C64-8.1.3.1 was agreed by PAP at its 33rd session.

4. THE COUNCIL IS REQUESTED TO

Approve input paper C64-8.1.3.1.
